Indonesia economy has been continuously in growth track amid rapid change in Asia economy. Such growth is backed by strong domestic demand and it's being driven by the micro, small and medium size enterprise (MSME). The total registered number of MSME reached more than 22million in the country as of the end of 2012, which contributed more than 50 percent to the country's total GDP (Source: Ministry of Cooperatives and SME / BPS- Badan Pusat Statistik). We believe that comprehensive IT support shall certainly boost it up further more yet IDC best estimate shows SME's IT spending has achieved 1.1 Billion USD by the end of 2014.

IndoTrading.com supports MSME business owner to market their offering by listing in IndoTrading database and hosting its micro shop site, leading users find relevant providers of products and service quickly and efficiently. Currently IndoTrading.com has around 1.7million visitors monthly and 12k merchants registered, recorded 400% growth year-on-year after the seed funding last year.

Throughout this partnership, OPT SEA dispatches one board member joining the IndoTrading management team to support and accelerate its business growth by leveraging OPT group's know-how and assets of the online marketing business in Asia.
